Ref.: Tender Announcement - Improvement of CRA and CPL IT tools

DECISION ON CANCELATION OF TENDER PROCEDURE

Following the further internal evaluation of the activities that were envisaged to be implemented under the contract, as well as the analysis of current beneficiaries' needs, it is hereby concluded that the circumstances concerning the Improvement of CRA and CPL IT tools have changed.

Namely, after internal evaluation of the results under Outcome 1 and Outcome 2 (Targeted jurisdictions have strengthened their corruption risk assessment (CRA) and corruption proofing of legislation mechanisms (CPL)), it was determined that further pursuit of development and delivery of IT tools at the jurisdiction level would not bear the results and impact originally anticipated. It is recognized that the support the jurisdictions need on their digitalization path far surpasses the scope and the budget of the SEE-TAC Program.

Consequently, the tender announcement for improvement of CRA and CPL IT tools is hereby cancelled.

Desislava Gotskova, Head of Secretariat
